Climate protection at work and in everyday life

myclimate carbon education presents remarkable facts, questions habits, and develops realistic measures with you. Establish a sustainable position with a long-term outlook. Invest in the future today.

CO₂-Reduction

Carbon offsetting as an entrepreneurial challenge.

The savings potential of active carbon offsetting not only helps the environment but also benefits your business or organisation.

Energy efficiency

There is no end to the improvements that can be achieved.

Business success results from products and services that achieve the highest customer satisfaction through excellent quality.

Motivation

Every employee is a part of the solution.

The involvement of leadership and employees in a continuing quest for improvements results in ongoing small, but relevant innovations.

What you can achieve:

- Carbon offsetting through the consistent realisation of savings potentials and optimal CO₂ reduction.
- Cost savings and reduction of dependency as positive externalities of managing resources more sustainably.
- Motivated employees, trainees, professionals and leadership as a result of participation and activation.

Allow yourself to be inspired by the following suggestions for professional development. We are happy to provide advice and to discuss your ideas and requests. This is how custom-made and successful offers for professional development are created for your business, your employees and for the climate.

Climate Lunch

Input & Discussion for 8 to 25 People

Employees will gain insight into the topic of climate change at the workplace and in everyday life. Connections between our personal everyday lives, the climate, and personal measures that may be taken to combat climate change will be discussed.

General Input (¾ hour)

Green Day

Workshop for 8 to 25 People

80% of the people know a lot about the cause and effect of climate change, but only 30% effectively apply their climate knowledge to their everyday life. This is why the tangible implementation of energy efficiency measures in businesses is the focal point of this workshop.

workshop from 2 hours to one day

Additional excursions, discovery trips in the vicinity, or the simulation game triCO₂lor make the Green Day an experience to be remembered.

Carbon Neutrality as a Product

Training for 8 to 25 People

People buy products they understand and can trust. However, explaining carbon neutrality and carbon offsetting to customers is not that easy. This training will give employees an in-depth insight into carbon offsetting mechanisms and practice in the selling of voluntary carbon-offsetting measures.

workshop from 2 hours to one day

Climate Detectives at Daughter's Day Three Workshops for 8 to 25 People

On Daughter's Day in November, daughters (and sons) of employees will use a carbon checklist to analyse which actions can be taken to reduce CO₂ emissions. Children and parents then use the filled-in checklist to come up with suggestions that the company can implement within the next three months.

During the course of the following three months, there will be three 4-hour follow-up workshops covering the topics of energy-efficient workplaces, carbon-neutral company functions and mobility.

There will be an awards ceremony at which the daughters and sons of the employees will be invited as guests of honour. Employee groups will present the measures that have been implemented, after which a children's jury will present awards to the best projects.

Climate Detectives includes three parts:

Introduction/Daughter's Day

3 Workshops

Awards Ceremony

The costs of professional development vary according to content, duration and size of the business. Especially for NGOs and smaller businesses, discounts may apply.

myclimate carbon education is oriented toward your needs. We develop custom-made offers for professional development for your business, your employees and for the climate.

We are ready to help, to answer any questions you may have or to prepare a quote for your organisation.
