

Inside Switzerland goes even greener

You may have noticed that, since the beginning of the year, *Inside Switzerland* has carried the myclimate logo, which belongs to the non-profit foundation, The Climate Protection Partnership, an international climate protection organisation based in Switzerland (www.myclimate.org). As publishers, we want to provide you with a quarterly publication while offsetting our carbon emissions and producing as little CO₂ as possible. So our climate-impacting emissions have been calculated and we are now investing in other sustainable projects to reduce our carbon footprint. We also use FSC paper (www.fsc.org). The Forest Stewardship Council label provides a link between responsible production and consumption of forest products, and, after all, paper is made of trees! To be even more ecologically conscious, most of our deliveries within Zurich are made by the bicycle courier service Veloblitz (www.veloblitz.ch). The company is celebrating its 25th anniversary this year and has been a valuable partner to us from the very start.
