operations”**

The road to climate-neutral operations

myclimate
Consulting and solutions

Do you know the volume of greenhouse gas emissions that your company causes? Where are there unavoidable greenhouse gas emissions? And where is there potential for reductions? myclimate offers you two ways to measure, assess and reduce your emissions.

Offsetting with a Climate-neutral label

Just a few clicks to climate-neutral operations: With our innovative web solution, you can calculate the annual carbon footprint of your business in an instant. By offsetting your emissions, you can acquire the “climate-neutral operations” label.

Your benefits

- **Simple:** You can calculate your carbon footprint quickly and easily by means of independent data recording and automated label creation.
- **Efficient:** Fast set-up, and easy handling and processing.
- **Automated:** A plausibility check is completed automatically by comparing your data with reference companies. Your information is also reviewed for completeness and accuracy.
- **Confirmed:** The “climate-neutral operations” label and the **offsetting confirmation** provide evidence that all CO₂ emissions of your business have been calculated for the financial year in question and offset through recognised carbon offset projects.

Package price: CHF 500

(plus VAT and offset payment)

We will be happy to provide our existing customers with the comparison data from the previous year as an Excel file in the event of a switch to the online solution.

CO₂ Management with a Climate-Neutral Label

With the smart 3 software solution from myclimate, you get the best advice and the specialist support that you need in your progress towards climate-neutral operations.

Your benefits

- **Personal:** Personal contact, support with the modelling of missing values, advice on measures for reduction and success monitoring, recommendations for action.
- **Individual:** Configurable system that can be adapted to new requirements, such as countries, locations or analysis levels, etc. at any time.
- **Validated:** We carry out a plausibility check on your carbon footprint.
- **Flexible:** Existing prior-year datasets from our existing customers and the account are backed up. This means that it is possible to easily switch from smart 3 Basic to Advanced at any time.
- **Confirmed:** The “climate-neutral operations” label and the **offsetting certificate** from myclimate confirm that all your company’s CO₂ emissions have been calculated for the relevant financial year and offset through recognised carbon offset projects.

We would be happy to provide you with personal advice.

The Corporate Carbon Footprint

The corporate carbon footprint (CCF) holistically establishes your company's carbon footprint through the recording and calculating of climate-relevant consumption data. The creation of a CCF is the starting point for the reporting of company-related greenhouse gases, and is indispensable for putting your operations or company on a partially or completely carbon-neutral footing. The footprint forms the basis for corporate climate protection.

Methodology

The CCF – also known as a the CO₂ footprint, carbon footprint or greenhouse gas inventory – records the overall volume of company-related greenhouse gas emissions that arise both with respect to company sites and along the value chain. The emissions that have arisen over 12 months are retrospectively considered and established in tonnes of CO₂ equivalents (CO₂ eq. according to IPCC 20017 GWP 100a) per year. The basis for establishing and reporting a CCF takes place according to internationally recognised standards.

About myclimate

myclimate is a partner for effective climate protection, globally and locally. Together with partners from the business sector, as well as private individuals, myclimate wants to shape the future of the world through consultancy and educational programmes, as well as its own projects. myclimate pursues this in a market-oriented and customer-focused way as a non-profit organisation.

With projects of the highest quality (Gold Standard, Plan Vivo), the Swiss foundation promotes quantifiable climate protection and sustainable development worldwide. In addition, myclimate encourages every single person to make a contribution to the future through action-oriented and interactive educational programmes. myclimate, which has its headquarters in Zurich, also offers advice on integrated climate protection with tangible added value. This is done through IT solutions, prizes, analyses and resource management.
