Join YES Iran 2018: Hands-On Learning Lab for Sustainability Change Makers

In November 2018 in Chaboksar at the Caspian Sea Shore, 30 Graduates and Young Professionals of All Disciplines Will Develop a Sustainability Pioneer Project!

Do you think there is too much talk and too little action when it comes to sustainability?

Do you wonder how to make sustainability work in developing and emerging countries?

In the YES Impact Lab Iran 2018, you will...

- develop and implement practical solutions
- to let arise a «Green Eco Village»
- by thinking out-of-the-box
- together with an interdisciplinary team
- using an entrepreneurial approach
- in a highly motivating environment

Your Benefits as Participant

- Acquire special knowledge and gain new skills
- Learn how to professionally make sustainability work
- Receive a certificate and ECTS credits
- Work on the whole cycle of project development

YES Iran 2018

Call for Participants

Pop-up Sustainability Micro Think-Tanks

YES Impact Labs are two-week hands-on trainings for graduate students and young professionals from all fields and countries. Together with experts from practice and science as well as local stakeholders, these global talents work on innovative solution approaches for designated sustainability challenges.

Almost 50 YES Impact Labs have taken place since 2000 to address sustainability challenges in emerging environments. In December 2016, together with the Amirkabir University of Technology of Tehran, a first YES Impact Lab was held in Iran. The forthcoming cycle 2018/ 19 is aimed at developing and implementing a cleantech pilot project on site.

Date & Place

The YES Impact Lab Iran 2018 will take place from 3rd to 17th November 2018 at the Ahuan Recreation Complex in Chaboksar at the Caspian Sea.

Apply if...

- you are a graduate university student or a young professional in business, public administration, academia, NGO or international organization
- you are aged between 21 and 34 years
- you have proficiency in the English language
- you are highly dedicated to sustainability issues
- you have a strong interest in interdisciplinary collaboration and intercultural exchange
- you are willing to share your skills and expertise in the YES Impact Lab and with the YES Alumni Community
- you are able to attend the entire two weeks

Application Process

Apply at yes.myclimate.org and include your CV, motivation letter and recommendation letter. **As places are limited, early application is strongly recommended.**

Tuition Fee

Students: EUR 875 | Non-Students: EUR 1750

Scholarships are available for the tuition fee, but not for travel costs. The fee is subsidized by the organizing partners and covers lodging, full board, transfers, excursions, program activities, materials, the YES Alumni Community membership.

You are responsible for paying and organizing your visa, your health and travel insurance (mandatory), your travel to Iran, and other personal expenses if any.

Visa

Start your visa process immediately after you have been selected as participant by contacting the Iranian embassy in your country. A visa invitation letter will be provided.

Program Details

Visit yes.myclimate.org to find up-to-date information about the application process, the daily program, the involved experts and institutions, ECTS recognition and the organizing team.
